

Cefas is the UK's most diverse centre for applied marine and freshwater science and research, covering an unrivalled breadth of specialist areas to provide a fully integrated, multi-disciplinary approach to all our customers' needs.

Cefas' £16 million investment in a new office building and state-of-the-art research laboratory in Lowestoft, eastern England, is due for completion in Spring 2020.

RV Cefas Endeavour is an ocean going multi-disciplinary scientific research and survey vessel managed and operated by Cefas, in partnership with P&O Maritime.
