

Institut de recherche pour le développement

A new french fleet organization

A combined unit service -The French Oceanographic Fleet

Previous situation

4 owners, 4 operators : Ifremer : 4 ocean class vessels, 4 coastal vessels, a completed panel of submarine and seismic equipment

INSU :2 coastal vessels

IRD : 2 regional class vessels

Towards a centralized governance of the french fleet

➢ In 2008, the Ministry of Scientific Research supported the creation of the Fleet Strategic and Technical Committee (CSTF), charged mainly with updating the strategy on maritime assets for oceanographic research.

➤As part of the continuation of a state-sponsored modernisation audit carried out in April 2006 and the conclusions of the CSTF presented in March 2010 and marked by efforts to respond to needs to control the costs of oceanic exploration, the four operators of the fleet decided to create a single fleet administration entity in the form of a *Unité Mixte de Service* (combined service unit -UMS).The UMS has been created on March 03rd 2011.

The French Oceanographic Fleet

Integrated scheduling of vessels and equipment (reduce transit time, optimize equipment and teams inter-operability,...)

Co-ordination of investment policies of the four members

Ability to propose a plan of concerted evolution of the national fleet

French Oceanographic Fleet schedule 2012
